1. About Call2Recycle

Call2Recycle is Canada's first and largest national battery collection and recycling program. Since 1997, it has safely collected, transported, and recycled household batteries on behalf of battery manufacturers, retailers, distributors, and other obligated producers across the province. These producers partner with Call2Recycle for its cost-effectiveness, transparency, and industry-leading safety standards. (See [Appendix A](#) for the full list of Saskatchewan members.)

Since 2021, Call2Recycle has served as Saskatchewan's provincially approved producer responsibility organization for single-use and rechargeable household batteries weighing under five kilograms (5 kg). Its collection program is nationally recognized for safety, efficiency, and regulatory compliance. Regulated batteries are recovered and reused in the manufacturing of new products such as batteries, cookware, and appliances, contributing to a strong and sustainable circular economy in Canada.

Working with a broad network of partners, Call2Recycle operates 383 collection facilities throughout Saskatchewan, including public and private drop-off locations. These sites offer residents a convenient and reliable way to responsibly dispose of their used household batteries.

2. Executive Summary

Saskatchewan residents deposited 132,702 kg of used batteries through the Call2Recycle provincial program in 2025, including 107,363 kg of single-use (primary) batteries and 25,339 kg of rechargeable batteries. This provincial collection total excludes an additional 7,757 kg of small-sealed-lead-acid batteries (SSLA) that Call2Recycle accepted and recycled this year, as they do not fall within the province's regulated program.

The number of active Call2Recycle collection facilities in Saskatchewan increased by 1% in 2025 to 383, up from 378 in 2024. Eight in ten Saskatchewanians (80%) have access to a Call2Recycle drop-off location within 15 kilometres of their home, and Call2Recycle continues to identify and establish new collection locations in the province that will optimize performance and establish coverage that meets the 80% target established in the EPR plan.

Call2Recycle continued to promote its new consumer brand, *Recycle Your Batteries, Canada!* with a robust awareness campaign through its network of collection partners, as well as television and online promotions featuring Canadian soccer legend Christine Sinclair, the brand's national ambassador. This brand is now present in all collection sites across Canada, including Saskatchewan, and displayed on all battery containers and information materials. This new consumer brand is supported

by a dedicated consumer website, recycleyourbatteries.ca, providing useful educational information on the importance of recycling batteries and an online locator tool to find the closest drop-off location.

Call2Recycle continues to operate the safest, most efficient, transparent and socially responsible battery collection, transportation and recycling program in Canada. It is the only battery recycling organization in Canada certified to four standards for battery collection, transportation and recycling safety: R2v3, ISO 14001, ISO 45001 and ISO 9001. These distinctions confirm Call2Recycle's ongoing strict adherence to stringent safety requirements, its commitment to the environment, occupational health and safety, and its commitment to supporting the province in achieving its circular economy objectives.

3. Directorial and Advisory Oversight

3.1. Board of Directors

Call2Recycle is a federally incorporated non-profit organization, governed by a Board of Directors committed to ensuring the program's efficiency and effectiveness. Board members include representatives from battery manufacturers, distributors, retailers, and independent directors. For a complete list of the members of the Board of Directors, see [Appendix B](#).

3.2. Saskatchewan Advisory Committee

In addition to the Board of Directors, Call2Recycle's operations in Saskatchewan are overseen by its Saskatchewan Advisory Committee. This committee meets twice a year (or more if needed) and includes members from the Saskatchewan Ministry of Environment, the Saskatchewan Waste Reduction Council, and the Retail Council of Canada, among others. For a complete list of Advisory Committee members, see [Appendix C](#).

The Saskatchewan Advisory Committee supports stakeholders in providing feedback on the program and raising issues of local concern. It advises on program goals, reviews results, and provides input on the industry, market, policy, and opportunities for continuous improvement. Call2Recycle provides committee members with updates on program performance, enhancements, and changes as required. The Saskatchewan Advisory Committee convened on July 28 and December 1, 2025, with Call2Recycle presenting updates on the program's activities and gathering input on organizational and program objectives in the province.

4. Public Education Materials and Strategies

Call2Recycle is continually dedicated to building awareness of battery recycling and encouraging consumers to divert their used batteries from landfills. To this end, it executes a range of national online and television promotional campaigns in support of such events as National Battery Day (February), Earth Month (April) and Circular Economy Month (October), as well as regional campaigns targeted specifically at Saskatchewan residents.

In January 2024, Call2Recycle rolled out its new consumer brand, *Recycle Your Batteries, Canada!* In October of the same year, Call2Recycle introduced Canadian soccer legend Christine Sinclair as Brand Ambassador, to help raise awareness of *Recycle Your Batteries, Canada!* and encourage Canadians to recycle their used batteries.

2025 marked the first full year with Christine Sinclair anchoring our awareness campaigns, and the impact of her influence was fully measured. Campaigns featuring Christine significantly increased the program's visibility, improved consumer engagement and increased collection results.

In 2025, Call2Recycle also strengthened collaboration within Saskatchewan's stewardship ecosystem. Joint awareness efforts with SK Recycles supported consistent, province-aligned messaging on battery safety and proper recycling, and Call2Recycle participated in the Saskatchewan Waste Reduction Council conference to share program insights and support broader waste diversion objectives.

4.1. Awareness Campaigns

In 2025, Call2Recycle executed four major campaigns to educate Canadians about safe battery recycling, delivering over 138 million ad impressions. In February–March, Call2Recycle launched a nationally televised campaign featuring brand ambassador Christine Sinclair to educate consumers about the three steps of safe battery recycling, using the slogan “Collect, Protect, Drop-Off.” The campaign aired across digital and specialty television networks, including TSN, Sportsnet, HGTV and CTV News, with placements during high-profile broadcasts such as the Oscars.

In April (Earth Month) and October (Circular Economy Month), Call2Recycle ran promotions that converted awareness to action, encouraging consumers to scan QR codes at battery drop-off locations for a chance to win prizes, including cash and a trip to Vancouver to meet Christine Sinclair. Digital ads were customized for the Saskatchewan audience by incorporating logos of regional collection partners. During the summer, Call2Recycle broadcast Public Service Announcements featuring Fire Chief Rocco Volpe, who educated consumers about the fire risks that batteries pose when placed in the trash.

Annual tracking research showed sustained growth in awareness in Saskatchewan as a result of these campaigns: awareness that household batteries can be recycled increased from 69% in 2023 to 74% in 2024 and 76% in 2025.

4.2. Online & Social Engagement

The new *Recycle Your Batteries, Canada!* website gained significant traction and consumer engagement this year.

The *Recycle Your Batteries, Canada!* core brand website attracted over 27,000 Saskatchewan residents in 2025, an increase of +29% vs 2024 (21,000 visitors). Additionally, our contest site attracted another 8,300 Saskatchewan visitors, a 161% increase over 2024. Collectively, nearly 36,000 Saskatchewan residents visited *Recycle Your Batteries, Canada!* websites in 2025, a +46% increase from 2024.

This increased engagement reflects the growing awareness and interest driven by ongoing promotions by Call2Recycle, the memorable call to action of the *Recycle Your Batteries, Canada!* brand, and the website's accessible design.

4.3. Sponsorships, Partnerships and Events

In 2025, Call2Recycle continued educating students about battery recycling through its partnership with Earth Rangers. Ten Saskatchewan schools competed in the Battery Blitz contest in the spring, encouraging students to take an active role in environmental protection and adopt battery recycling habits early. Call2Recycle also enhanced its school-based education initiatives with the introduction of a new Student Workbook designed to support classroom learning. Featuring interactive activities, vibrant illustrations and new mascots -Smarty the Smart Container and Boxer the battery collection box - the workbook helps students understand how batteries work, why recycling is important and how recovered materials contribute to a circular economy. In 2026, the resource will be distributed more broadly through partners including Earth Rangers to further expand student engagement across Saskatchewan.

4.4. Consumer Awareness Assessment

Each year, Call2Recycle commissions a survey conducted by IPSOS to assess the battery recycling awareness and habits of Saskatchewan residents. In 2025, 79% of survey respondents believed household batteries can be effectively recycled, a 6-point decrease from 2024 that is largely attributable to a change in survey wording, which this year added the qualifier “effectively.” Broader awareness that household batteries can be recycled remained strong at 76% (up 3 points), while 18% of respondents were unsure whether batteries can be recycled. Recycling behaviour strengthened meaningfully: Saskatchewanians recycled an average of 54% of their household batteries (up 9 points from 2024), nearly three-quarters (73%) recycled at least some of their batteries (up 11 points), and more than three in ten (31%) recycled all of them. Fewer batteries were sent to the garbage, with the average proportion thrown away falling to 18% (down 5 points) and 69% of respondents throwing none away (up 9 points). Familiarity with the precautions needed to store batteries safely also improved, rising to 69% (up 6 points).

Call2Recycle will use the insights from this year’s survey to develop tailored initiatives to address awareness and behavioural gaps and drive up recycling activity.

Consumer Awareness and Recycling Incidences Targets	Target	2025 Actual
Percentage of Saskatchewanians who are aware that consumer batteries can be recycled	87%	79%
Percentage of Saskatchewanians who recycle their consumer batteries (%)	54%	54%

5. Collection System and Facilities

Call2Recycle’s Saskatchewan collection network includes locations in retail outlets, business services, public agencies, manufacturing, and wholesale collectors. A collection facility is considered active if it joined the Call2Recycle program in 2025, returned a full box or bulk shipment of batteries during the year, or ordered a replacement collection box during 2025. The number of active Call2Recycle collection facilities in Saskatchewan increased by 1% in 2025 to 383, up from 378 in 2024.

This change represents Call2Recycle’s efforts to optimize collection facilities in areas with the highest likelihood of traffic and recycling activity while expanding access to battery recycling collection options.

In 2025, eight in ten Saskatchewanians (80%) had access to a *Recycle Your Batteries, Canada!* drop-off location within 15 kilometres of their home, and Call2Recycle continues to identify sites that will enable it to meet the 80% target established in the EPR plan.

Active Call2Recycle Collection Facilities		
	2025	2024
Public	142	215
Private	241	163
Total	383	378

The following table lists the active collection facilities by sector.

2025 Active Collection Facilities by Sector				
Sector	2025	2024	Change (#)	Change (%)
Business Services	42	120	-78	-65%
Public Agencies	109	104	5	5%
Manufacturing	14	16	-2	-13%
Retail	196	137	59	43%
Other	22	1	21	—
Total	383	378	5	1%

6. Collection Results

Battery collections in Saskatchewan increased in 2025, up 18% from 2024. In 2025, 132,702 kg of used batteries were collected in the province through the *Recycle Your Batteries, Canada!* program. Rechargeable battery collections rose by 33%, from 19,101 to 25,339. Single-use (primary) batteries made up the lion's share of collections (81%), and their 107,363 kg collected represented a 15% increase from the previous year.

These totals do not include an additional 7,757 kg of small-sealed-lead-acid batteries (SSLA) that were collected this year. Call2Recycle receives small-sealed-lead-acid batteries, which are often dropped off at collection sites due to their compact size and the general public's difficulty distinguishing them from other rechargeable battery types. However, SSLA batteries fall outside the scope of the province's Household Hazardous Waste Products Stewardship Regulation that govern the province's collection program.

The following chart provides a year-over-year comparison of regulated battery collections by Call2Recycle in the province.

Call2Recycle Collections by Weight (kg)*			
Type	2025	2024	% Change
Single Use (Primary)	107,363	93,579	15%
Rechargeable	25,339	19,101	33%
Total	132,702	112,680	18%

In 2025, Call2Recycle's total Saskatchewan battery collections reached 140,459 kg. This total comprised of 132,702 kg of regulated batteries and 7,757 kg of non-regulated small-sealed-lead-acid (SSLA) batteries.* The following table details regulated collections by battery chemistry.

Battery Chemistry	2025 Collections (kg)	% of Total
Alkaline	103,951	78%
Lithium-ion (Li-ion)	15,721	12%
Nickel-Cadmium (NiCd)	6,760	5%
Lithium (primary)	3,412	3%
Nickel-Metal Hydride (NiMH)	2,858	2%
Total (regulated)	132,702	100%

**SSLA is not a regulated battery chemistry under Saskatchewan's household battery program, but it is frequently dropped off at collection sites, where Call2Recycle accepts and recycles it. SSLA volumes are reported separately and are excluded from the regulated chemistry totals above.*

7.Recovered Product Management and Materials Processing

Call2Recycle is steadfastly committed to operating the safest, most efficient, transparent and socially responsible battery collection, transportation and recycling program in Canada. To this end, it was the first program of its kind to achieve Responsible Recycling (R2) certification, the electronics recycling industry's leading certification, and continues to be the only battery recycling organization in Canada certified to four standards for battery collection, transportation and recycling safety: R2v3, ISO 14001, ISO 45001 and ISO 9001. These distinctions confirm Call2Recycle's ongoing strict adherence to stringent requirements regarding safe, secure battery collection and processing, and proper downstream management of its battery collections, which includes not exporting to developing countries or sending materials to local landfills, and its commitment to the environment and occupational health and safety.

Collected Battery Management		
Batteries Recycled	Batteries Reconditioned	Batteries Disposed
97%	0%	3%

Call2Recycle's sorting and processing partners continue to meet the highest environmental, health and safety, transportation, and financial operations standards.

Recycling is the most effective and practical way to divert used batteries from landfills and contribute to the circular economy. Whenever possible, Call2Recycle uses local service providers to minimize its environmental footprint. Call2Recycle's approved sorters and processors use state-of-the-art techniques to reclaim materials following the highest environmental, transportation, health and safety, and financial operations standards.

8.Program Funding

Call2Recycle collects Environmental Handling Fees (EHFs) on each unit of primary batteries, rechargeable batteries and batteries sold with or in portable flashlights and spotlights, e-toys, and

smoke and carbon monoxide detectors in Saskatchewan. As always, Call2Recycle will continue to monitor revenues to ensure the fee structure accurately reflects program costs.

Please see [Appendix F](#) for Call2Recycle's audited financial statements, which detail the total EHF's collected in Saskatchewan to fund the program, the amount spent to operate and administer the program, and the amount spent on public education, awareness, and communications. The program does not provide recycling incentives. Therefore, none are disclosed in the financial statements.

Independent Auditor's Report

**To the Members of
Call2Recycle Canada, Inc.**

Opinion

We have audited the financial statements of Call2Recycle Canada, Inc. (the "Entity"), which comprise the statement of financial position as at December 31, 2025, and the statements of changes in net assets, operations and cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Entity as at December 31, 2025, and its results of operations and its cash flows for the year then ended in accordance with Canadian accounting standards for not-for-profit organizations.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Entity in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

Management is responsible for the other information. The other information comprises the information included in the Annual Report but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in this auditor's report. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian accounting standards for not-for-profit organizations, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Entity's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Entity or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Entity's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Entity to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Call2Recycle Canada, Inc. Notes to Financial Statements

December 31, 2025

1. Significant Accounting Policies

Nature and Purpose of Operations

Call2Recycle Canada, Inc. (the "Entity") is a not-for-profit organization formed on January 1, 2017. The Entity's head office is registered in Toronto Ontario, and conducts its operations throughout all of Canada.

The Entity's purpose is to promote social welfare by addressing environmental concerns related to the recycling or proper disposal of consumer batteries. The Entity operates battery collection and recycling programs and educates the public with respect to the proper disposal and recycling of batteries, and related products.

The Entity seeks to be the leader in the environmentally sound collection, transportation and recycling of batteries and related products. The Entity is committed to a cleaner, healthier environment through public education on battery recycling. All aspects of the Entity's business are conducted in an environmentally sensitive manner, as the Entity is convinced that sound environmental product stewardship and sound business practices go hand in hand.

The Entity is exempt from income tax under Section 149(1) of the Income Tax Act (Canada).

Basis of Accounting

The financial statements have been prepared using Canadian accounting standards for not-for-profit organizations.

Revenue Recognition

The Entity follows the deferral method of accounting for revenues.

Unrestricted revenues are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured. Restricted revenues are recognized as revenue in the year in which the related expenses are incurred.

Steward fees are received from legally obligated stewards in regulated provinces (QC, ONT, BC, MB, PEI, SK, NS, YK and AB), and from non-legally obligated battery manufacturers in all other jurisdictions based on sales into those jurisdictions. The Entity recognizes these fees as revenue in the year that battery units are sold by the stewards to consumers and businesses.

The costs of the corresponding collection and recycling for some of these batteries may occur in future years, and those associated costs are reported as expenses of the Entity in the year that they are incurred. Call2Recycle Canada, Inc. is committed to the collection and recycling of these batteries.

Call2Recycle Canada, Inc. Notes to Financial Statements

December 31, 2025

1. Significant Accounting Policies (continued)

Revenue Recognition - Continued	Unrestricted net investment income is recognized as revenue when earned. Unrestricted revenues from the sales of recycled materials are recognized in income when the recovered materials are sold and the amount to be recovered can be estimated and collection is reasonable assured.
Financial Instruments	Financial instruments are recorded at fair value at initial recognition. In subsequent periods, equities traded in an active market and derivatives are reported at fair value, with any change in fair value reported in income. All other financial instruments are reported at cost or amortized cost less impairment. Transaction costs on the acquisition, sale or issue of financial instruments are expensed for those items measured at fair value and charged to the financial instrument for those measured at amortized cost. Financial assets are tested for impairment when indicators of impairment exist. When a significant change in the expected timing or amount of the future cash flows of the financial asset is identified, the carrying amount of the financial asset is reduced and the amount of the write-down is recognized in net income. A previously recognized impairment loss may be reversed to the extent of the improvement, provided it is not greater than the amount that would have been reported at the date of the reversal had the impairment not been recognized previously, and the amount of the reversal is recognized in net income.
Use of Estimates	The preparation of the financial statements requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Items subject to such estimates and assumptions include: - accrued expenses - allocation of expenses - allowance for doubtful accounts
Accounts Receivable	Uncollectable amounts receivable are written off at the time the accounts are determined to be uncollectable. There is no allowance for doubtful accounts at December 31, 2025 as management of the Entity considers any possible bad debts to be negligible.
Expenses	Material management and processing costs are recorded when the collection and processing services (freight, handling, recycling of materials) has been provided. Other expenditures are recognized as incurred.

Call2Recycle Canada, Inc.

Notes to Financial Statements

December 31, 2025

2. Cash

The Entity maintains the majority of its cash balance in a Canadian financial institution. The Canada Deposit Insurance Corporation (CDIC) insures this account up to \$100,000 for this financial institution. From time to time the aggregate funds held in this institution may exceed the CDIC insured limits and may not be covered by CDIC insurance. Management does not anticipate any material effect on the financial position of the Entity as a result of this concentration.

3. Marketable Securities

The carrying amounts of investments are comprised of the following:

	2025	2024
At fair value:		
Cash held for long-term investment	\$ 1,128,209	\$ 1,288,669
Bonds	14,356,845	15,215,224
Equity investments	7,331,438	5,188,026
Real estate funds	1,126,205	1,179,394
Hedge fund investments	1,665,663	1,233,290
Precious metals and commodity funds	217,610	110,759
	<u>\$ 25,825,970</u>	<u>\$ 24,215,362</u>

Call2Recycle Canada, Inc. Notes to Financial Statements

December 31, 2025

4. Government Remittances

Included in accounts payable and accrued liabilities are government remittances payable of \$871,637 (2024 - \$297,817).

5. Board Designated Net Assets

The Entity's governing board has designated \$18,407,518 (2024 - \$17,701,641) as of December 31, 2025 for future use in the regulated provinces of Quebec, Ontario, British Columbia, Manitoba, Prince Edward Island, Saskatchewan, Nova Scotia, Yukon and Alberta. The designated balances by regulated province are as follows:

	2025	2024
Quebec	\$ 13,373,324	\$ 10,452,773
Ontario	(9,208,236)	(4,649,997)
British Columbia	8,224,474	8,148,982
Manitoba	2,375,765	2,388,077
Prince Edward Island	(136,269)	(170,352)
Saskatchewan	1,529,690	1,239,176
Nova Scotia	1,055,560	292,982
Yukon	63,502	-
Alberta	1,129,708	-
	\$ 18,407,518	\$ 17,701,641

6. Material Management and Processing

Material management and processing is comprised of the following:

	2025	2024
Material management and processing	\$ 31,358,983	\$ 28,587,793
Recycled materials income	(1,022,096)	(1,359,149)
	\$ 30,336,887	\$ 27,228,644

Call2Recycle Canada, Inc. Notes to Financial Statements

December 31, 2025

7. Allocation of Expenses

Expenses are charged directly to their respective jurisdiction based on actual costs as incurred. When expenses are not identified to a specific jurisdiction, but benefit all jurisdictions, they are allocated among the jurisdictions based on the Entity's allocation methodology. Collections and processing costs are allocated based on battery collections for each jurisdiction. Salary and benefits are allocated based on employee time allocation by jurisdiction. Other expenses, including professional fees, general marketing, communication and promotion, shared service costs, office supplies, and occupancy, which cannot be identified with a specific jurisdiction are allocated based on the total population at the end of the year in the jurisdiction.

8. Significant Contractual Arrangements

The Entity is governed by a Board of Directors that is separate and independent of its former parent entity, but continues to contract IT services from the Battery Network (formerly Call2Recycle, Inc. US). Fees paid for contracted services to the Battery Network for 2025 were CDN \$1,238,995 (2024 - \$1,004,074).

Call2Recycle Canada, Inc. Notes to Financial Statements

December 31, 2025

9. Financial Instruments

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Entity is exposed to credit risk resulting from the possibility that the registrants of the Entity defaults on their financial obligations; if there is a concentration of transactions carried out with the same counterparty; or of financial obligations which have similar economic characteristics such that they could be similarly affected by changes in economic conditions. The Entity's financial instruments that are exposed to concentrations of credit risk relate primarily to its accounts receivable. The Entity's registrants are numerous and diverse, which reduces the concentration of risk. Management closely evaluates the collectibility to mitigate this risk.

Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

The Entity is exposed to financial risk that arises from fluctuations in the sale of recyclable batteries and consumer electronic products. This risk is minimized by an expected corresponding decrease in program delivery and recycling process expenses and by the regulations established by the respective Department of the Environment in each jurisdiction in which the Entity operates.

The Entity is exposed to market risk through its investment in marketable securities, the value of which changes through fluctuations in market values. The investment policies of the Entity are designed to mitigate this risk through diversification of the portfolio.

Currency Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Entity is exposed to currency risk as a result of its significant contractual arrangement for IT services with a US organization and its stock portfolio holdings denominated in US currency.

10. Commitments

The Entity has entered into various lease commitments for building rentals. Expected payments over the next five years are as follows:

	2026	2027	2028	2029	2030
Quebec	\$ 39,935	\$ 40,995	\$ 3,423	\$ -	\$ -
Ontario	139,802	171,275	172,380	175,695	44,200
	<u>\$ 179,737</u>	<u>\$ 212,270</u>	<u>\$ 175,803</u>	<u>\$ 175,695</u>	<u>\$ 44,200</u>

Call2Recycle Canada, Inc. Notes to Financial Statements

December 31, 2025

11. Contingencies

During fiscal 2021, the Entity conducted reviews of various service providers in the Province of Ontario who collected recyclable materials on behalf of the Entity. As a result of the reviews, certain service providers had their contracts terminated for non-compliance with program requirements.

At the time of the terminations one service provider had previously submitted invoices to the Entity for materials collected in the amount of \$1.4 million which are included in accounts payable. Subsequent to the date of termination of the agreement, no further materials have been accepted from the service provider and no further payments have been made against the outstanding accounts payable balance.

Upon termination of the agreement the Entity has demanded a refund of prior amounts paid to the service provider based upon the observations made in its compliance reviews.

In addition to the \$1.4 million in accounts payable in dispute, the service provider has filed a claim for an additional \$10.5 million in costs plus damages. The Entity in turn has filed a claim for \$5.2 million in damages plus interest and costs.

Management is not able to estimate the likelihood of either any recovery or losses as the outcome of this matter and therefore no further provisions have been made in these financial statements. Any gains or losses will be recorded at the time they become known.

The Entity is subject to other possible legal claims of which the legitimacy or magnitude cannot be determined at this time. During the year, a legal claim was filed against the Entity for \$15.0 million in damages. As management is not able to estimate the likelihood of any loss at this time, no provision for these claims have been made in these financial statements. Any loss will be recorded at the time they become known.

12. Line of Credit

The Entity has a line of credit agreement with a bank which provides borrowings up to \$5,000,000. Borrowings under the agreement bear interest at the Adjusted Alternative Reference Rate plus 1% per annum. At December 31, 2025, there were no borrowings against the line of credit. Borrowings under the line of credit are secured by substantially all of the investments held by the Entity.
